- Refreshed, Easy-to-Use Interface.
- Provides the timely and accurate tank data needed to control distribution costs, from the office all the way to the driver.
- Know exactly where to go, when and with how much product.

## It's SMARTank on Your Smartphone

You're mobile, so we're mobile. Your data and analytics portal needs to be mobile, and mobile-friendly too. The SMARTank Mobile App gives users just that. It was created to meet the essential needs of the desktop portal's mobile user. This mobilizes the user's world when it comes to the benefits derived from tank monitoring – knowledge and intelligence that enables efficient replenishment decision making - data that ultimately cuts tank servicing costs.

Meeting demand without over servicing your tanks is one of your biggest challenges. You need to ensure that your customers can get the product they need when they need it, but you also need to keep your own costs in line and your margins healthy. Make the most of your fleet, driver labor hours and fuel by using SMARTank on your mobile devices. Keep your customers happy and your costs in check.

## Know On the Go

With SMARTank on your phone or other mobile device, you can better manage and maximize your resources. You'll know when to deliver and when to pick up – avoiding costly run outs, lost business, emergency deliveries, and short fills. Your technicians can set up a new tank or service an existing one in the field. You'll be able to increase your profitability through more efficient operations and better forecasting. You'll be more proactive instead of reactive. And by increasing your operational efficiencies, you can expand your customer base using just your current resources.

## Yes, There's an App for That – Ours

For businesses who understand that the value and ROI of remote mobile telemetry doesn't come from the hardware, but from using the data – from wherever you are. The SMARTank Mobile App can be the perfect solution for all your users, and of course it's included with the SMARTank service.

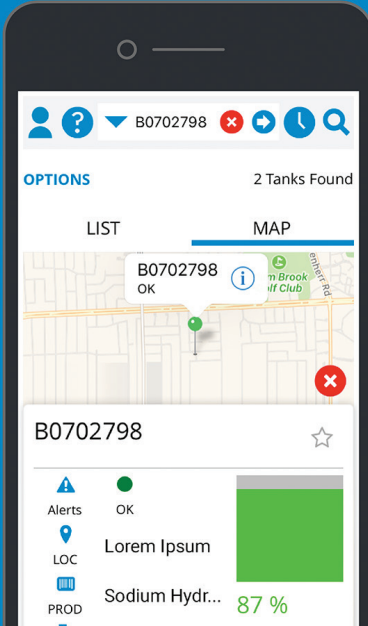

## Join Hundreds of Companies with Proven Results

Our tank monitoring solutions have a proven impact on profitability. They provide clear financial and operational benefits through capital and operating expense savings and efficiency improvements. The technology also provides powerful information tools that help system users improve customer service, attract new revenue and compete more effectively, effectively.

Contact your SkyBitz Tank Monitoring Sales Professional for more information or hit the App Store or Google Play today to download the app of your choice.

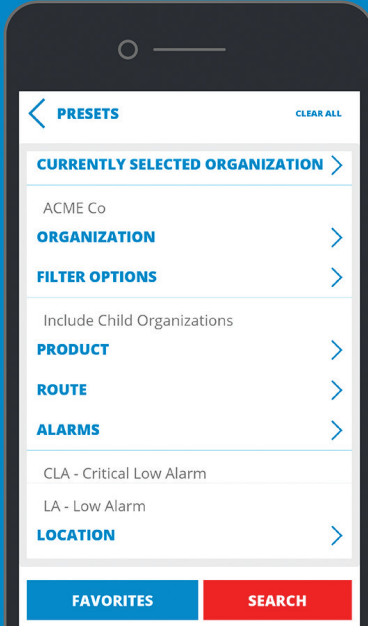

**See Your Tanks**  
 See the status of all of your tanks from anywhere.

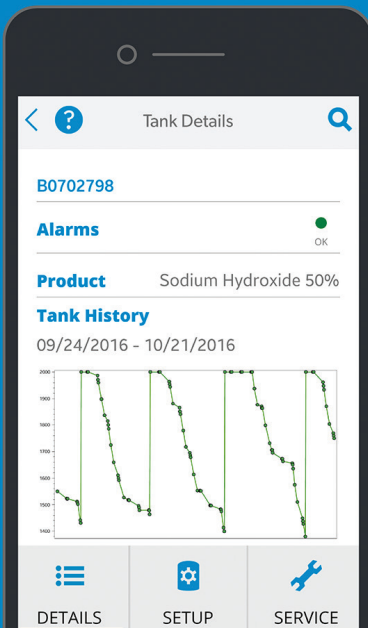

The screenshot shows a mobile app interface with a search bar at the top containing 'B0702798'. Below the search bar, there are 'OPTIONS' and '2 Tanks Found'. A toggle switch is set to 'MAP', showing a map with a green location pin for tank B0702798. Below the map, a card for tank B0702798 shows an 'Alerts' status of 'OK' with a green dot, a 'LOC' field with 'Lorem Ipsum', and a 'PROD' field with 'Sodium Hydr...' and a level indicator at '87%'.

**Search Your Tanks**  
 Create Search Filters to identify potential issues before they occur.

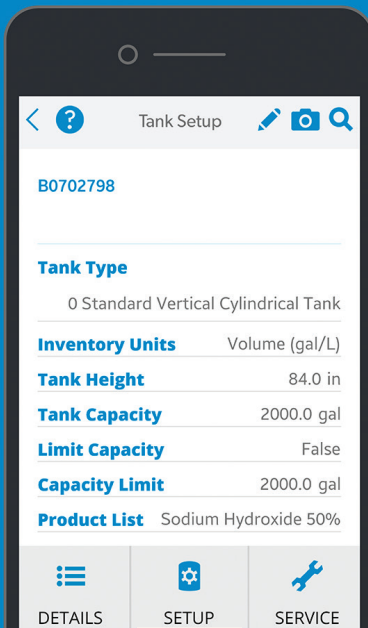

The screenshot shows a 'PRESETS' screen with a 'CLEAR ALL' button. Under 'CURRENTLY SELECTED ORGANIZATION', 'ACME Co' is listed. Below are filter options: 'Include Child Organizations', 'PRODUCT', 'ROUTE', 'ALARMS', and 'LOCATION'. Under 'ALARMS', 'CLA - Critical Low Alarm' and 'LA - Low Alarm' are listed. At the bottom, there are 'FAVORITES' and 'SEARCH' buttons.

**Check Your Tanks**  
 See level history, alarms and other details on demand.

The screenshot shows a 'Tank Details' screen for tank B0702798. It includes an 'Alarms' section with 'OK' status, a 'Product' section with 'Sodium Hydroxide 50%', and a 'Tank History' section with a date range of '09/24/2016 - 10/21/2016' and a line graph showing level fluctuations. A bottom navigation bar has 'DETAILS', 'SETUP', and 'SERVICE' tabs.

**Configure Your Tanks**  
 Set up a new tank or service an existing one from your phone.

The screenshot shows a 'Tank Setup' screen for tank B0702798. It lists configuration details: 'Tank Type' as '0 Standard Vertical Cylindrical Tank', 'Inventory Units' as 'Volume (gal/L)', 'Tank Height' as '84.0 in', 'Tank Capacity' as '2000.0 gal', 'Limit Capacity' as 'False', and 'Capacity Limit' as '2000.0 gal'. The 'Product List' is 'Sodium Hydroxide 50%'. A bottom navigation bar has 'DETAILS', 'SETUP', and 'SERVICE' tabs.
