

Master Dealer Benefits

- **Control** - The Master Dealer (MD) is the first point of contact for new sales, service, billing & support.
- **Unlimited Earning Potential** - The Master Dealer controls pricing and may add hardware and monthly service fee markups without restriction.
- **Leasing/Financing** - The MD has control on how a deal is paid for using either cash or leasing options to fund a deal.
- **Print Shop Access** - Order product data sheets and other marketing materials quickly and easily via an online portal to help you sell.

Our Brand and Your Reputation

As a SkyBitz Local Fleets Master Dealer you will have access to a broad portfolio of GPS fleet management and asset tracking solutions that meet the needs of all of your customers.

With a strong product line for sales, service and delivery fleets, SkyBitz Local Fleets solutions give fleet operators visibility into vehicle location, fuel usage, speed and mileage through real-time automated reporting.

Combine your sales expertise and reputation with our brand awareness, engineering, product and market knowledge, and you're ready to compete in the GPS fleet tracking marketplace and increase your company's offerings and profitability.

What Does the Master Dealer Designation Mean?

The Master Dealer Designation allows you to purchase SkyBitz Local Fleets products and services at discounted rates and resell those products and services to your customers and/or prospects with suitable markups to allow for maximum profit potential.

Partner With Us

SkyBitz Local Fleets is actively seeking to expand brand distribution, hardware and data service sales through Master Dealers. Contact us soon to discover how working with us can significantly enhance the relationship with your current customers and provide them with a valuable efficiency tool for their business.

Marketing Support

SkyBitz Local Fleets provides access to marketing support for its Master Dealers. Printed and online datasheets, product photography, installation videos, website access to customize your own collateral, case studies, customer testimonials etc. – it's all available through a secure website page requiring login credentials for Master Dealers to access.

A Wide Portfolio to Service All Of Your Customers

At SkyBitz we have everything you need to help your customers successfully reduce their fleet expenses and improve profit margins by using our technology. Some of these applications include:

- A robust base GPS tracking application with Google Maps & Traffic, Reports, Alerts, Landmarks and Maintenance as standard features.
- Driver Dispatch w/messaging & turn-by-turn directions - using a Garmin PND or our Mobile Data Terminal.
- Remote Driver ID tracking
- Remote Refrigerated Temperature Monitoring
- Remote Engine Diagnostics sent to your customer's desktop

We offer these systems and more to our master dealers at significantly low wholesale prices to give you maximum residual profit potential on every deal.

Complete Product Portfolio

As a SkyBitz Local Fleets Master Dealer you receive access to a strong portfolio of GPS tracking solutions for vehicles and assets. With SkyBitz Local Fleets solutions you can give your customers full visibility into vehicle location, fuel usage, speed and mileage and more, through real-time automated tracking and reporting. Empower your customers with fleet management tools that can improve their productivity and their bottom line

SA3000

The SkyBitz Local Fleets SA3000 is a best-in-class GPS fleet tracking product designed for optimum performance which allows for covert installation. Easily installed and concealed under the vehicle dashboard, with no audible distinctions or external window mounted antennas, the device provides an uninterrupted flow of vehicle tracking data.

SA2000

The SkyBitz SA2000 is a plug-and-play, self-installed GPS fleet tracking product that can be deployed in minutes by any driver. It provides an uninterrupted flow of vehicle tracking data. The SA2000 simply inserts into the OBD-II port of a vehicle without taking a vehicle out of service or requiring wired, fitted solutions.

DT3000 for Heavy Equipment

The SkyBitz DT3000 easily tracks, monitors and manages your customer's heavy equipment. Whether they rent or own their equipment, knowing where their assets are, and how long a piece of equipment has been running can help their business reduce downtime and complete more jobs.

AT3100

The SkyBitz AT-3100 is a stand-alone device used for fixed and mobile asset tracking that is ideal for inventory control and theft prevention. SkyBitz Local Fleets gives you the detailed reporting information you need so you can increase your asset utilization.
